Specialist Knowledge for Teaching Mathematics (Core Maths Teachers) Programme

Support for teachers who are new to teaching Core Maths

What is involved?

This programme supports teachers in developing specialist knowledge for teaching Core Maths and increases their confidence in teaching the course. The programme forms part of the overall Advanced Mathematics Support Programme (AMSP) and Maths Hubs Core Maths professional development offer.

The principal focus is on Core Maths subject knowledge and pedagogy, and the programme will be based on six key themes: applying Fermi estimation and modelling; exploring statistics; making sense of finance; using the pre-release materials; developing critical analysis; and creating contextualised activities.

Who can take part?

This programme is for teachers who are in their first two years of teaching Core Maths and are teaching a Core Maths class during the academic year 2026/27.

Find out more

Search **SKTM core maths teachers** online or contact your local Maths Hub:

<https://www.kandmmathshub.org/work-group/offer>

Benefits

- Your students will gain raised awareness of the use of maths and statistics in everyday life
- You will plan tasks and/or sequences of learning to promote student understanding, confidence and progress
- You will understand the philosophy of Core Maths, with its approach to maths through contextualised problem-solving
- You will understand how online learning and technology can be used to support Core Maths teaching

This **programme**, run by the Maths Hubs Programme, in partnership with the AMSP, is **free** to participating schools.
